Dear Customer,

The Herb Pantry was started in 1994 with the hopes that it would teach people how to safely use herbs and which herbs to put together. Since that beginning it seems that goal has been reached, not only with a wide variety of herbs but also by holding down the cost of those herbs. I am constantly studying the use of herbs. Now that I am a Master Herbalist, certified through Dr. Christopher's School of Natural Healing, I will continue my herbal education in order to better serve you in the future.

My goal now, as the policy always has been, for The Herb Pantry to make available to you the best, organic herbs that can be obtained. We have many bulk herbs to offer, along with organic herbal tea blends and spice blends. We also make our own salves, tinctures, oils and medicinal herbal blends. We will continue doing all of this and much more, as we move into the future.

In the past few years, natural products, alternative medicine and the herb industry has been growing abundantly. People are becoming more aware of natural remedies and their uses, as they can be used along with conventional methods. We are proud to be involved with this movement and endeavor to continue to offer the superior herbs, blends, tinctures, and salves that many of you have become accustomed to.

Besides growing and selling bulk herbs, I also offer classes on the many different uses of herbs. Call for a schedule if you are in the area. Consultations are available if there is a need. ...Call for an appointment.

What ever your needs are. ...Look to herbs for the right choice. They have been around for many, many centuries and have already proven themselves to our ancestors and us. As always, with pride and enthusiasm we strive to provide the best and largest selection of botanicals, both medicinal and culinary.

Vicki L. Vosburg, D.Sc  
Master Herbalist
